SELECTED ADMINISTRATIVE AND DATA PROJECT

Open FI\$Cal Vendor Transaction Analysis | Independent Portfolio Project

Microsoft Excel | 2026 - Present

- Structured and reviewed 4,083 public transaction records; standardized fields and created helper columns for fiscal periods, positive and negative amounts, and data-quality checks.
- Applied formulas, lookups, filters, PivotTables, and validation checks to identify missing values, fiscal-period inconsistencies, duplicate-looking records, and spending trends.
- Designed summary metrics and month-by-month fiscal views to present complex transaction data clearly for administrative and financial review.
- Documented formulas, review flags, and dashboard logic so the workbook can be checked, updated, and explained to a nontechnical reviewer.
